

## Description of New Features and Bug Fixes at Version 6.02d

			<b>Description</b>
1	Bug Fix	Trap on File Read	A trap has been added to the file reader to pick up the case where the user has a model based on a user defined template but then not included it I the model file. Now reports Error.
2	Bug Fix	Line Colours	A previous release change to how line colours are controlled introduced an error this is fixed at this release.
3	New	Template	A new default rear template has been added for a Macpherson strut with a reversed lower A-arm.
4	Bug Fix	Body Data	The problem with the positioning of the default body data has been resolved. Now correctly positioned relative to ground when first loaded.
5	Bug Fix	Excel Export	Previously it was possible for data values exported to an Excel file to become rounded/clipped to two decimal points when the value was in the 1000's. This has been resolved at this release with the number of dp's used now based on the currently display settings.
